Docket No. AM100224 P1 Patent

This listing of claims will replace prior versions and listings of claims, canceled claims are canceled without prejudice.

Listing of Claims:

1. - 14. (canceled)

15. - 31. (withdrawn)

32. (twice amended) A tablet <u>consisting of emprising</u>—a fast dissolve granulation, an active ingredient, and—a single saccharide, and <u>at least one non-saccharide excipient selected from the group consisting of a souring agent, aspartame, sucralose, a flavoring agent, a disintegrant, a glidant, silicon dioxide and cornstarch.</u>

wherein the fast dissolve granulation consists essentially of a portion of the single saccharide and a low melting point compound that melts or softens at or below 37°C, and

wherein the low melting point compound comprises less than about 20% (wt/wt) of the fast dissolve granulation and from about 0.01% to about 2.5% (wt/wt) of the tablet, and

wherein the tablet has a hardness of less than about 1.7 kP.

- 33. (previously presented) The tablet of claim 32 wherein the single saccharide is mannifol.
- 34. (previously presented) The tablet of claim 32 wherein the low melting point compound is one or more compounds selected from the group consisting of hydrogenated oil, and partially hydrogenated oil.
- 35. (previously presented) The tablet of claim 34 wherein the hydrogenated oil or partially hydrogenated oil is a vegetable oil.
- 36. (twice amended) A tablet <u>consisting of comprising</u>—a fast dissolve granulation, an active ingredient, and—a single saccharide, and <u>at least one non-saccharide excipient selected from the group consisting of a souring agent, aspartame, sucralose, a flavoring agent, a disintegrant, a glidant, silicon dioxide and cornstarch, and</u>

wherein the fast dissolve granulation consists essentially of a portion of the single saccharide and a low melting point compound that melts or softens at or below 37°C selected from the group consisting of hydrogenated vegetable oil, and partially hydrogenated vegetable oil—and

wherein the low melting point compound comprises less than about 20% (wt/wt) of the fast dissolve granulation and from about 0.01% to about 2.5% (wt/wt) of the tablet -and

wherein the tablet has a hardness of less than about 1.7 kP.

- 37. (previously presented) The tablet of claim 36 wherein the saccharide is mannitol
- 38. (withdrawn) A tablet consisting of a fast dissolve granulation, an active ingredient, mannitol, sucralose, a favor, a disintegrant, corn starch and silicon dioxide wherein the fast dissolve granulation consists essentially of a portion of the mannitol and a low melting point compound that melts or softens at or below 37°C selected from the group consisting of hydrogenated vegetable oil, and partially hydrogenated vegetable oil and wherein the low melting point compound comprises less than about 20% (wt/wt) of the fast dissolve granulation and from about 0.01% to about 2.5% (wt/wt) of the tablet, and wherein the tablet has a hardness of about 1.7 kP and is a fast dissolving tablet.
- 39. (withdrawn) The tablet of claim 38 further consisting of a souring agent.
